

Curriculum Vision - Computing

Our Computing curriculum aims to instil a sense of enjoyment around using technology and to develop pupils' appreciation of its capabilities and the opportunities technology offers to create, manage, organise and collaborate. 'Tinkering' with software and programs forms a part of the ethos of our scheme of work as we wish to develop pupils' confidence when encountering new technology, which is vital in the subject's ever changing landscape. Through our curriculum, we intend for pupils to not be only digitally competent and have a range of transferable skills to help them in the future, but also to be responsible online citizens.
