

## Curriculum Vision - Spanish

Our Spanish curriculum offers opportunities for children to gain enjoyment, pride and a sense of achievement in learning a new language. They will be equipped with the tools to express themselves creatively and imaginatively in another language whilst developing their knowledge of a different culture. Pupils will explore their own cultural identities and those of others. The 'Rachel Hawkes' Spanish scheme of learning emphasises the importance of communication, including language learning's important role in the 'education of the ear'. This underpins children's capabilities in oracy, which is critical to effective communication as well as a key foundation for literacy.
